

System Requirements for LLC Fund Manager

This document describes the minimum system requirements for the **LLC Fund Manager** software platform. **LLC Fund Manager** will run on most windows systems. Requirements may vary depending on your operating system.

The document was last updated on August 20, 2023.

We recommend a dedicated computer server. If the server will be running additional applications, the recommended specifications should be increased accordingly.

For additional information and/or questions please feel free to contact our support group at support@loanservicingsoft.com or 1-800-993-1839.

| Additional software | <ul style="list-style-type: none"> Microsoft Windows Installer 4.5 or a later version Microsoft .NET Framework 4.6.2 or later version |

Notes:

- The hardware and software specifications listed in this document are for **LLC Fund Manager** version 20.0.110 software that was available at the time of this publication. As newer system versions are introduced, **LLC Fund Manager** reserves the right to update and modify these recommendations.
- Hardware, memory, and storage requirements can vary greatly, depending on the number of users, network applications, hard disk sizes, connection type, and other issues. RAM recommendations are the minimum requirements and may not be optimal for your operational environment. Your organization should regularly review company hardware and software resources and compare them to current system requirements.
- LLC Fund Manager** recommends the use of backup and security components for hardware, data, and application redundancy.
- Backup is the responsibility of the user.**
- Configuration of hardware and application security is the responsibility of the user.
